In the Palace of Culture and Science in Warsaw, the 21st International Fair of Analytical and Measurement Technology EuroLab and the 8th CrimeLab Fair were completed.

During the official opening of the fair, the Central Office of Measures (GUM) became the laureate of the 2019 Grand Prix. The statuette in appreciation for cooperation with the fair in the past year, at the hands of Urszula Potęga, the President of MT Targi Polska, was picked up by Maciej Dobieszewski, act. President of GUM.

Visitors to the trade fair, interested in metrology and measurement topics, could get complete information at the stands of the Central Office of Measures. GUM experts shared knowledge about the latest measurement methods and reference materials used in laboratories. You could also buy newer and older GUM publications, including brochures of laboratories, the Bulletin "Metrology and Hallmarking" and other specialist publications.

On Thursday, March 14, we invited the fair guests to "Metrology Day. 100 years of GUM.", held at the Goethe Hall in PKiN, where lots of interesting presentations and lectures were exhibited.
