Session on Metrology for Digital Transformation

Published by: Kamila Szulc

The workshop organised by EURAMET (European Association of National Metrology Institutes) will take place on 23-24 and 29 September 2021.

EURAMET shall support the strategic digital transformation of metrology both in line with the European Commission's objectives of achieving a fair, competitive and digitally-enhanced economy and the specific needs of EURAMET members.

To support this theme and stakeholder engagement in this area, EURAMET is organising a series of free online workshops to promote the latest developments related to the topics of processes, data management, digital technologies and artificial intelligence.
