## Privacy Statement

The names and email addresses entered in the journal site will be used exclusively for the stated purposes of this journal and will not be made available for any other purpose or to any other party. The data collected from registered and non-registered users of this journal falls within the scope of the standard functioning of peer-reviewed journals. The journal's editorial team collects such information only insofar as is necessary or appropriate to fulfill the purpose of the visitor's interaction with the journal. It includes information that makes communication possible for the editorial process; it is used to inform readers about the authorship and editing of content and it enables collecting aggregated data on readership behaviors. The data will not be sold by this journal or nor will it be used for purposes other than those stated here. The authors published in this journal are responsible for the human subject data that figures in the research reported here. Those involved in editing this journal seek to be compliant with industry standards for data privacy, including the European Union's General Data Protection Regulation (GDPR) provision for "data subject rights" that include (a) breach notification; (b) right of access; (c) the right to be forgotten; (d) data portability; and (e) privacy by design. The GDPR also allows for the recognition of "the public interest in the availability of the data," which has a particular saliency for those involved in maintaining, with the greatest integrity possible, the public record of scholarly publishing.

Users registered in any capacity with the journal can edit their personal data and notification settings.

## Cookie Policy

A cookie is a small text file that a website saves on your computer or mobile device when you visit the site. It enables the website to remember your actions and preferences (such as login, language, font size and other display preferences) over a period of time, so you don't have to keep re-entering them whenever you come back to the site or browse from one page to another. Journal website visitors who do not wish to have cookies placed on their computers should set their browsers to refuse cookies before using the journal website, with the drawback that certain features of the website may not function properly without the aid of cookies.
